

EARTH DAY

A TRIBUTE TO NATURE

LEARNING OBJECTIVE:

This hands-on activity taught them about the importance of caring for our planet and how plants help the environment

Our KG 1 and KG 2 students came together to celebrate Earth Day with great enthusiasm, creativity, and a shared love for nature. Dressed in shades of green and blue to represent the beauty of our planet, the young learners took part in a variety of engaging and meaningful activities designed to nurture environmental awareness.

The activities continued with hands-on creativity. KG 1 children enjoyed a thumb printing activity, using bright colours to create vibrant prints of leaves, flowers, and Earth shapes. Their joyful expressions and laughter filled the room with happiness and artistic flair. Meanwhile, KG 2 students took part in an Earth Day colouring session and created beautiful handprint art, symbolizing their commitment to protecting nature.

Both groups enjoyed a mini nature walk around the school campus, where they observed flowers, trees, and small insects. This simple yet enriching experience allowed them to connect with nature and observe its beauty firsthand.

LEARNING OUTCOME:

It was a fun and educational experience that emphasized the significance of Earth Day and environmental stewardship.
