

INTERNATIONAL PLASTIC FREE DAY

Date and Day	20-05-2026, Wednesday
Objectives	• Students will be able to understand the harmful effects of plastic pollution on the environment. • Students will explore different materials and identify eco-friendly alternatives to plastic. • Students will learn the importance of reducing, reusing, and recycling plastic in their daily life.
Conducted by	Ms. Jeniba & Ms. Jabin
Participants	Grade 1&2 students
Activity	Grade 1 students celebrated International Plastic Free Day through a creative gift bag making activity. Using eco-friendly materials, they designed colourful bags and confidently shared their ideas, promoting awareness of sustainable alternatives while enhancing creativity and communication skills. Grade 2 students marked International Plastic Free Day with engaging activities such as plastic observation, chart and graph creation, and braided rag rug making using old T-shirts. These hands-on activities encouraged environmental awareness and promoted sustainable habits among students.
Learning outcome	• Students will understand why reducing plastic use helps protect the environment. • Students recognized the importance of reducing plastic waste through creative alternatives. • Students demonstrated the concept of reuse by creating a rag rug using old fabric materials.
