

INTERNATIONAL DAY OF EDUCATION

Literacy, Skill and Profession

LEARNING OBJECTIVE:

To help children understand the importance of education.

Our school celebrated the International Day of Education with great enthusiasm and joy. The day began with our little learners dressing up as their dream professions such as doctors, astronauts, teachers, and engineers. Each child confidently spoke a few lines about what they aspire to become, showcasing their imagination and communication skills.

Adding special value to the celebration, some parents visited the classrooms and shared insights about their professions. This interactive session helped children connect learning with real-life experiences and inspired them to dream big.

The celebration concluded with a cheerful rally and parade. Children enthusiastically raised slogans highlighting the importance of education, spreading messages of positivity, unity, and hope throughout the school.

LEARNING OUTCOME:

Children spoke confidently about their aspirations.
