

INTERNATIONAL PLASTIC FREE **DAY**

GO GREEN, SAY NO TO PLASTIC

LEARNING OBJECTIVE:

Encourage use of sustainable alternatives and recycling habits.

KG1 and KG2 students celebrated International Plastic Free Day with great enthusiasm through a special event titled “Go Green, Say No to Plastic!” The day began with a cheerful rally across the school corridors, where children carried colorful placards and handmade paper bags, spreading awareness about the harmful effects of plastic. Their bright smiles and spirited chants reflected their eagerness to protect the planet and embrace eco-friendly habits. Teachers engaged them in conversations about environmental care, highlighting the importance of reducing plastic use.

As part of the event, students brought old clothes and gently used items from home and placed them in the school’s Recycling Bin. This hands-on activity taught them the value of reducing waste and making sustainable choices. Through this initiative, children learned how small actions can make a big difference. The event not only promoted environmental awareness but also nurtured responsibility, creativity, and teamwork in young learners.

LEARNING OUTCOME:

Students demonstrated understanding of the 3Rs: Reduce, Reuse, Recycle.
