

# EARTH DAY

## “Plant, Grow, and Save”

### **LEARNING OBJECTIVE:**

To introduce basic concepts of plant growth through seed germination.

KG1 and KG2 celebrated Earth Day with great enthusiasm and joy. In KG1, children created beautiful nature crowns at home and wore them proudly. They also came dressed in green, symbolizing their love and care for the Earth. In KG2, students participated in an engaging Show and Tell activity, where they dressed according to the Earth theme and presented creative items with confidence.

The celebration included informative videos and presentations that helped children understand the importance of protecting our planet. A special highlight was the seed germination activity, through which students learned how plants grow. The day was filled with meaningful learning experiences and memorable moments captured through photographs.

### **LEARNING OUTCOME:**

Students developed a sense of responsibility towards the environment and gained basic knowledge of how plants grow.

**DATE: 22-April-2026**
