

INTERNATIONAL PLASTIC FREE DAY

“Reuse, Reduce, and Recycle”

LEARNING OBJECTIVE:

To create awareness about reducing plastic use and protecting the environment.

KG1 and KG2 observed International Plastic-Free Day with great enthusiasm and active participation. The children learned about the importance of reducing plastic usage and protecting the environment. They watched an informative video and took a simple pledge to care for and help save the Earth. Students also brought plastic and other waste materials from home and participated in a hands-on sorting activity. They carefully sorted the materials into different coloured boxes for paper, plastic, and cans, helping them understand the concept of waste segregation. The children later enjoyed a creative thumb-painting activity where they drew beautiful trees. Many joyful moments were captured through photographs, making the day a meaningful, enjoyable, and educational learning experience for all.

LEARNING OUTCOME:

Children developed creativity and awareness through hands-on activities.
