

ONLINE CLASS

“Flexible, Interactive, and Virtual”

LEARNING OBJECTIVE:

To provide an engaging and stimulating online learning experience.

Our KG 1 and KG 2 online classes have been designed to be both fun and highly engaging for our young learners. Through colorful visuals, interactive activities, and storytelling, students are encouraged to explore, create, and participate actively. Music, movement, and virtual games make each session lively and enjoyable, keeping children motivated and attentive.

Creative activities such as clay modeling, drawing, and collaborative tasks foster imagination, self-expression even in a virtual setting. The online environment is carefully structured to balance learning and play, ensuring students feel excited and confident in every session.

LEARNING OUTCOME:

Students actively participated, demonstrated creativity, and showed enthusiasm and comfort with virtual classes.
