

MATHIMAGINATION

COUNTING, SHOPPING AND VARIETY

LEARNING OBJECTIVE:

To help children apply basic mathematical concepts such as counting, addition, and money handling in real-life situations..

Our KG1 and KG2 little mathematicians proudly hosted their very own creative market, “**Souq Al Hisab**,” transforming the school into a lively marketplace of learning and fun. The event was inaugurated by our **Principal, Vice Principal, and Head of Section Nandita Ma’am**, who cheerfully purchased the first items, adding warmth and encouragement to the celebration.

The young learners showcased their handmade crafts; **paper bags, pencil holders, photo frames, glass art, and bookmarks** each created with creativity and care. Taking on roles as promoters, managers, deal-makers, and cashiers, the children experienced the joy of teamwork, communication, and real-world math skills in action.

Teachers, admin staff, and visitors explored the colorful stalls and applauded the children’s enthusiasm and efforts. The day beautifully blended **learning, creativity, and confidence**, as every child shone as a bright young entrepreneur.

LEARNING OUTCOME:

Children confidently demonstrated number skills by handling prices, transactions, and change.
