

RED DAY

BOLD, BRIGHT BEAUTIFUL

LEARNING OBJECTIVE:

To develop observation and cognitive skills through hands-on experiences.

Red Day was celebrated joyfully by our kindergarten students with a special red fruit chaat-making activity. Children came dressed in bright red outfits and brought red fruits like apples, cherries, strawberries, pomegranates and raspberries. With the help of teachers, they prepared a healthy and tasty fruit chaat. The classroom was filled with excitement as students learned about different red fruits, their taste, and health benefits.

The activity encouraged healthy eating habits and hands-on learning. Red-themed objects added to the festive mood. The day ended with happy smiles and delicious memories of a fun and fruity celebration.

LEARNING OUTCOME:

The activity encouraged healthy eating habits and hands-on learning.
