

# SENSORY ORGANS

## CURIOSITY, DISCOVERY, JOY

### **LEARNING OBJECTIVE:**

To help students understand the five senses: sight, smell, hearing, touch, and taste.

Our KG1 and KG2 learners had an exciting and educational experience exploring their five senses. We set up interactive sensory stations focusing on sight, smell, hearing, touch, and taste. The children eagerly moved from one station to the next, engaging with different objects, sounds, and textures, allowing them to discover how their senses help them perceive the world.

Their faces lit up with curiosity and excitement as they learned through hands-on activities. This joyful day was filled with laughter, discovery, and learning, and we are incredibly proud of our young sensory explorers for their enthusiasm and participation.

### **LEARNING OUTCOME:**

Students identified and described the five senses and their functions.
