

WORLD ENVIRONMENT DAY BLUE DAY

CELEBRATE PROTECT AND SUSTAIN

LEARNING OBJECTIVE:

To instill environmental awareness and responsibility through interactive and nature-based activities.

To celebrate World Environment Day, our KG1 and KG2 students enjoyed a day filled with learning, nature, and hands-on fun. The day began with an engaging video presentation that helped the children understand the importance of protecting the environment. They learned about saving water, planting trees, and keeping the earth clean. This was followed by a nature walk in the park, where they explored the outdoors and connected with nature.

Back in the classroom, the children participated in a seed planting activity, eagerly getting their hands into the soil and learning how to care for plants. It was a joyful and meaningful experience that highlighted how even the youngest learners can contribute to a greener world.

LEARNING OUTCOME:

Students understood the importance of caring for nature, participated in eco-friendly practices, and developed a sense of responsibility toward the environment..
